

To install the drivers on SH-36S-PC on a windows 10 machine you must Disable the Driver Signature Enforcement.

From the Start Menu do the following:

1. Search for Change Advanced Startup Options
2. Click Restart Now
3. Click Troubleshoot
4. Click Advanced Ops
5. Click Startup setting
6. Click Restart
7. Click Disable Driver Signature Enforcement
8. Click #7

Now you need to install the SH-36S-PC software. Watch this video.

<https://www.youtube.com/watch?v=JR2j1koZR0U>

Fast forward to Step 1 at the 40 second mark. When you get to launch the PC Hawk and it gets stuck, jump to Step 9 at the 1 minute 2 second mark and follow up to the end, Step 24.

If you power cycle your PC before doing the install, you will need to start over from step 1 above.
